

## ROLLING HILLS ESTATES COMMITS TO CLEAN ENERGY

The City of Rolling Hills Estates is pleased to announce our community will soon enjoy the advantages of clean power at competitive rates. Beginning February 2019, [the Clean Power Alliance \(CPA\)](#) will be the electricity provider for residents of Rolling Hills Estates. Although the CPA will be sourcing your power, SCE will continue to deliver and bill you, and there won't be any material changes in your bill's appearance. While the CPA is a new provider for residential customers, businesses in Rolling Hills Estates have been enrolled in the program since June 2018.

The CPA ([www.cleanpoweralliance.org](http://www.cleanpoweralliance.org)) is comprised of 30 cities and the Counties of Los Angeles and Ventura, working together to bring clean energy choices to our communities. To foster its vision of maintaining a healthy, safe and sustainable environment, the City of Rolling Hills Estates has chosen "100% Green Power" as the default option for our community.

While we hope you share our commitment to environmental responsibility, the choice is ultimately yours, and you can switch from the City's 100% Green Power rate to a different level at any time. You have a choice between the following rate options:

- Lean Power, which is 36% renewable energy, will provide a 1-2% cost savings, compared to your SCE bill.
- Clean Power, which is 50% renewable energy, will provide a 0-1% cost savings, compared to your SCE bill.
- 100% Green Power, where all power is renewable, will result in an 8-9% premium, compared to your SCE bill.

You also can opt out entirely without any penalty and your electricity generation charges will remain with SCE; but keep in mind that, depending on your option, CPA rates will be cheaper and/or greener. Visit the CPA website to learn more about [Residential Rate Options](#).

No matter what rate you choose, our community will soon enjoy the benefits of the Clean Power Alliance, including local control, competitive rates, and environmentally friendly energy sources.

You will receive four notices via mail with instructions on how to choose between the different rate options along with customer support information. Again, you can choose between Lean Power, Clean Power, and 100% Green Power rates at any time and you can always opt out and return to SCE.

Learn more by visiting [www.cleanpoweralliance.org](http://www.cleanpoweralliance.org), by emailing
